TOULOUSE UNIVERSITY

- English literature, history and linguistics Licence.
- Web development as a side-project

PROFILE

As an international French student, I am in Limerick until the 16th, may 2026. I started practicing development in 2023, but became more professional in 2025 as I created websites for clients. I now seek to get more experience in an enterprise environment to get more knowledge and practical skills in web development. I'm also very interested in web design and web security. Everything related to development is a source of inspiration and interests me!
I am willing to work in a team to get different points of views !

WORK EXPERIENCE

- **EPI STUDIO**   2023 - PRESENT
  Elected President && Web dev.

  - A non-profit French development studio. We create Open-Source projects based on web apps, games or Minecraft.
  - Elected President, running the whole organization (finances, client relationships, partnerships, teams) and organizing teams on projects .
  - A team of 10 developers, 2 graphic designers and 4 board members (VP, finance advisor and secretary)
  - French website: https://www.epistudios.fr

PROJECTS

- **Clients' orders**
  - I worked on 4 professional websites, focused on a E-commerce shop, the website of my non-profit, a small business shop destined to show handmade statues and to buy them, and a website for my trainer friend.
  - **Tech used: Snipcart, JS, Node.JS, Figma, Git**

- **FlyingToDo - WebApp**
  - I created a webapp using Electron to make my own todolist application. I plan to continue developing it to become a simpler alternative of Notion, with less distractions *(see posts on linkedIn for more infos about my vision). Open source on Github.*
  - **Tech used: Js, Figma, Git, Github, electron, electron dependencies.**

- **Gaël One - Home drive**
  - **Creation of a home drive to upload, download and edit files online. Alternative to Google Drive setup on a home-server.**
  - **Tech used: Ubuntu Server, APIs, Node.JS, JS, Figma.**
